Toronto, ON

EDUCATION

HBSc. Applied Mathematics and Statistics Sep. 2020 - Jun. 2024
University of Toronto, St. George - Victoria College *3.82*

- Incoming fourth year pursuing Applied Mathematics specialist and Statistics major programs.
- Coursework includes Machine Learning, Data Analysis, Software Design, PDE, ODE, Analysis, Probability.

EXPERIENCE

Quantum Computing and Machine Learning Research Student May 2023 - Aug. 2023
Prof. Hans-Arno Jacobsen and Dr. Viki Kumar Prasad
Middelware Systems Research Group *Toronto, ON*

- NSERC USRA supported research opportunity in dynamic quantum circuit structure selection for regression.
- Applied local search approach towards selecting best-performing circuit for bond dissociation energy prediction.
- Implemented past GNN-based approaches for generalizing circuit performance.
- Technical experience with PennyLane, PyTorch Geometric, Shell scripting, Slurm for HPC training.

Deep Causal Inference Research Nov. 2022 - Present
Prof. Animesh Garg
PAIR Lab, University of Toronto *Toronto, ON*

- Adapting previous deep causal inference approaches towards discovery of structural equations in dynamical systems.

Statistical Genetics Research Assistant June 2020 - June 2021
Prof. Lei Sun and Prof. Andrew Paterson
University of Toronto *Toronto, ON*

- Used PLINK v1.9, R for quality control, association tests, and principal component analysis on genetic data.
- Created open-source tutorial for running Genome Wide Association Studies using publicly available 1000 Genomes gene expression data, wrote accompanying 40-page documentation and published pipeline.
- Lead a workshop replicating GWAS results for 15 students with an introductory understanding of statistics.

PUBLICATIONS

- Sugolov, A., Emmenegger, E., Paterson, A.D., Sun L. *Statistical Learning of Large-Scale Genetic Data: How to Run a Genome-Wide Association Study of Gene-Expression Data Using the 1000 Genomes Project Data.* Statistics in Biosciences (2023).

PRESENATIONS

Data Sciences Institute Research Day - Best Poster Aug. 2023
Data Sciences Institute, University of Toronto *Poster*

Undergraduate Engineering Research Day Aug. 2023
University of Toronto *Podium*

PROJECTS

Machine Learning

- Interested in the universal approximation of arbitrary continuous non-linear functions, dynamics discovery and PDEs.

- Trained deep-Q RL models with TensorFlow and Numpy for OpenAI gym environments.
- Coursework experience with additive, generalized linear models, multilevel models, random forests, gradient boosting, LDA, QDA, and logistic regression gradient descent from scratch.

Course Scheduling Application December 2021
CSC207: Software Design

- Created Java-based course scheduler implementing SOLID design principles, design patterns, and clean architecture.

TECHNICAL STRENGTHS

Languages & Markup	Python, R, Java, HTML, LaTeX
Packages	PyTorch, PennyLane, Numpy, Pandas, Sklearn, TensorFlow
Other	GitHub, Arch Linux, Shell, Slurm

HONOURS

NSERC Undergraduate Summer Research Assistantship May - Aug. 2023
Prof. Hans-Arno Jacobsen, Middleware Systems Research Group
Department of Electrical and Computer Engineering, University of Toronto

- Project in machine learning and quantum computing.

Regents Scholarship I, II, & III 2021 - 2023
Victoria College

University of Toronto Scholar 2020 - 2021
University of Toronto
